

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A kit for installing shaft equipment for an elevator including at least one guide rail, the kit comprising a suspension element, the suspension element being temporarily attachable to a ceiling of an elevator shaft or an upper part of a wall of the elevator shaft, and suspension means for carrying or supporting shaft equipment at least during installation, the suspension means being connectable to a hoisting device carrying an elevator car, a roof of the elevator car being usable for installation of the shaft equipment and the hoisting equipment and the hoisting device moving the elevator car during installation of the guide rail.

2. (Previously Presented) The kit as defined in claim 1, further comprising a mounting tool, the suspension means being set on the suspension element from a top floor by the mounting tool.

3. (Previously Presented) The kit as defined in claim 2, wherein the mounting tool is a bar or rope with one end provided with means for mounting the suspension means.

4. (Previously Presented) The kit as defined in claim 1, further comprising supporting means for supporting an overspeed

governor by the suspension element at least during installation of the elevator.

5. (Previously Presented) The kit as defined in claim 4, further comprising a mounting tool for the means for supporting the overspeed governor to be set on the suspension element from the top floor.

6. (Previously Presented) The kit as defined in claim 5, wherein the mounting tool comprises a bar with one end provided with a device for mounting of shaft equipment.

7. (Previously Presented) The kit as defined in claim 4, wherein the supporting means further comprising a mounting base for the overspeed governor, the mounting base having at least one adjusting element for adjusting a vertical height of the overspeed governor.

8. (New) The kit as defined in claim 1, wherein the shaft equipment includes at least one elevator rope, the hoisting device being separate from and non-connected to the at least one elevator rope.

9. (New) The kit as defined in claim 1, wherein the suspension element includes three separate attachments to the ceiling or upper part of the wall of the elevator shaft.
